## Snaps from past events

Did you get snapped at our last event? Check out the photos below and also our social media to see if you were snapped!

## Message from President Frank

Little Rock Lake is healthier now than it's been in a very long time. It will take all of us doing our part to maintain the health of the lake. We are in the process of forming a committee regarding aquatic plants for the coming spring. Please watch the website and Facebook page for further info, and be thinking what type of plantings you may be interested in planting.

We have contracted with Web Wizard Works to build a new website on a different platform that will be easier for Jason and Seth to make changes and updates to the website.

Please be safe on the ice! There is still open water.

## Membership

Our membership is always open to those who live on Little Rock Lake and those in our watershed. Information is on our website and Facebook page. Always feel free to contact any board member with any questions or concerns you may have.

## NO ICE MELT PRODUCT IS ENVIRONMENTALLY FREINDLY!

This is regardless of the wording on the packaging that is so liberally used that you might purchase at your local hardware or big box store.

All salt and deicing products are harmful to water quality, plant life, wild life, and infrastructure like our sidewalks. In reality stopping the chronic over use of these salt and de-icing chemicals that enter our rivers and lakes through storm sewers. In the event that you want more information on snow and ice removal the Mississippi Watershed Management Office has a in depth snow and ice removal page.

- 1) Sweep, shovel, or scrape snow off first. Throwing ice melt on top of snow does not help anything.
- 2) Use less product. Aim for a 3 inch span between granules. More product does not mean more melting.
- 3) Watch the temperature before using a ice melt product. Normal salt only works to a temperature of 15 degrees Fahrenheit. Other products have different temperature requirements please read the package labeling carefully before using.
- 4) Use Grit sand for traction if its too cold to use ice melt so that your area is less slippery.

LRLA Officers: President Frank Hard 320-761-5581,

Vice President Corrine Jacobs 320-266-7264

Secretary Amy Claude 320-2371786

Treasurer Rob Jacobs 320-266-7265

A complete list of board members is available on our web site.
